

Setting up Ubuntu for the first time

Connecting to the internet

1. Click on the wifi icon
2. Select Edit Connections
3. Select rpi_wpa2 and click Edit
4. Go to the Wifi Security Tab
 - Set Security to WPA & WPA2 Enterprise
 - Set Authentication to Protected EAP (PEAP)
 - Choose No CA Certificate is required
 - Inner Authentication set to MSCHAPv2
 - Input your RPI username and password

Using “`sudo apt-get install < package_name >`”

1. Search and open System Settings
2. Open Software and Updates
3. Check the checkbox next to the following:
 - Canonical-supported free and open-source software(main)
 - Community-maintained free and open-source software(universe)
 - Proprietary drivers for devices (restricted)
 - Software restricted by copyright or legal issues (multiverse)
4. Open a terminal and run: `sudo apt-get update`
5. To install any additional programs type `sudo apt-get install < package_name >`
