How to boot Ubuntu using the class flash drives

For Most Machines

1. Plug in flash drive
2. Restart Computer
3. Hit F12 and/or delete on bootup (this will open a new screen)
4. Select boot from flash drive

New Windows 10 machine

1. Plug in flash drive
2. Restart computer from menu while holding shift
3. Hit use a device
4. You should be in Ubuntu

If the above steps did not work, do the following

1. Repeat steps 1 and 2 above
2. Troubleshoot -> Advanced Settings -> UEFI Firmware Mode
3. You should be in a blue menu, navigate around until you find a secure boot option.
4. Turn off secure boot.
5. Repeat the steps under "New Windows 10 Machine" again
