Project Interim Report

We will have presentations on your projects during class beginning on 3/15 and running until everyone has presented. I currently have 9 projects on the schedule. We will plan on 3-5 minutes per project. Please prepare 1-3 slides covering:

- Your project title
- Team members
- Your description and goals for the semester
  - Make sure you differentiate work done for this course from any work done for another course or for independent study
- Project organization (see the PROJECT rubric)
- Contributions (expected to be minor at this point, but see the PROJECT rubric)
- Progress / issues to date (expected to be small)

The goal will be to take 30 minutes out of next lecture (end) and next lab (beginning) to get through everybody. I picked the order teams show up in Submitty:

- Legup
- Submitty/Lichen
- B-Ris
- NeRF or Nothing
- Dark Reader
- Visual Novel Parser
- OSS Poll Buddy
- Linux Kernel
- OpenCircuits

After your presentation, you will need to upload a PDF of your presentation to Submitty for grading.
